

Course Outline for: COMT 2096 Internship in Computer Technology**A. Course Description**

1. Number of credits: 2-4
2. Internship hours: 45 hours/credit
3. Prerequisites: Previous coursework in subject area and consent of instructor
4. Corequisites: None
5. MnTC Goals: None

Computer skills gained throughout the program are enhanced and comprehensively exercised through an on-the-job experience. This internship course provides career exploration and training in a supervised work setting and combines computing technology theory with practical experience. A student works 45 hours per credit at the internship site under the direction of the site supervisor and completes academic work in regular consultation with the faculty mentor. A student may choose to earn 2 to 4 credits.

B. Date last reviewed/updated: March 2023**C. Outline of Major Content Areas**

1. Provides students the opportunity for career exploration and training in fields related to Computer Technology.
2. Apply skills acquired in other courses in a real-world environment.

D. Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Demonstrate initiative, organization, and time management skills.
2. Make critical decisions to solve problems.
3. Demonstrate professional interpersonal skills.
4. Present tangible work product based on hands-on work experience.
5. Communicate professionally with colleagues both in writing and orally.

E. Methods for Assessing Student Learning

Methods for assessment may include, but are not limited to, the following:

1. Defined goals for completion during internship
2. Status Reports
3. Employer evaluation of work
4. Final Project Report
5. Final Project Presentation

F. Special Information

None
